

**MULTIRISK ASSESSMENT  
OF DISASTERS  
IN PARANGTRITIS COASTAL AREA**  
**A Comprehensive Analysis to Build Public Awareness  
Towards Various Events of Disasters**

**Editor:**  
**Sunarto**  
**Muh Aris Marfai**  
**Djati Mardiatno**

**GADJAH MADA UNIVERSITY PRESS**

## TABLE OF CONTENTS

Publication Review by Sutikno.....	v
Publication Review by Franck Lavigne.....	ix
Abstract .....	xii
Preface .....	xiii
List of Tables .....	xvii
List of Figures .....	xviii
Chapter I      Introduction .....	1
Chapter II      Environmental Characteristic of Parangtritis Coastal Area.....	12
Chapter III      Physical Processes and Coastal Dynamic.....	18
Chapter IV      Earthquakes	41
Chapter V      Tsunamis.....	63
Chapter VI      Social Disaster .....	88
Chapter VII      Multirisk Concept of Various Disasters.....	121
Chapter VIII      Disaster Based Spatial Planning.....	129
Chapter IX      Community Motivation and Participation in Reducing the Multirisk in Parangtritis Coastal Area.....	142

Chapter X	Multirisk of Various Disasters and Community Preparedness in Coastal Area in Pacitan City: a Comparison to Parangtritis Coastal Area .....	154
Chapter XI	Conclusion and Suggestion .....	163

## LIST OF TABLES

Table 1.1. Maslow's Hierarchy of Needs .....	5
Table 1.2. Success Indicators of Multirisk Research Activity in Parangtritis .....	9
Table 3.1. The Percentage of Vertical Distribution of Sand in Each Type of Sand Dune .....	33
Table 3.2. Deflation Risk in Parangtritis Coastal Area .....	36
Table 5.1. Records of Earthquake Triggered Tsunami .....	65
Table 5.2. The Relationship among Earthquake Magnitudes, Tsunami Magnitudes, and Tsunami Height.....	72
Table 5.3. Classification of Imamura-Iida Magnitude Scale .....	74
Table 5.4. Classification of Tsunami and Its Damaging Level ...	74
Table 5.5. Historical Data of Tsunami Occurred South of Java ..	75
Table 5.6. Scoring of Land Use Type/Class .....	82
Table 5.7. Components in Calculating the Tsunami Risk .....	83
Table 5.8. Score Intervals of Tsunami Risk Class .....	84
Table 6.1. Matrix of Social Disaster Risk Assessment .....	96
Table 6.2. Livelihood Based Social Groups in Parangtritis-Parangkusumo and Depok Beach Tourism Areas ....	101
Table 6.3. Social Disaster Risk Assessment in Parangtritis-Parangkusumo Beach and Depok Beach .....	108

Table 6.4. Land Use Changes in Parangtritis Village from 2004 – 2008 .....	111
Table 6.5. Risk Elements in Land Use Changes in Parangtritis Triangle Area .....	118
Table 8.1. The Change Analysis of the Parangtritis Towards Disaster Risks .....	139

## LIST OF FIGURES

Figure 1.1. Theoretical Background of the Multirisk Research in Parangtritis Area .....	7
Figure 2.1. Topographic Map of Parangtritis and Its Surroundings...	13
Figure 2.2. The Barchan Dunes in Parangtritis Coastal Area .....	14
Figure 2.3. The Interconnected Lava Flow Form (above) and Watugilang (below) in Parangkusumo Coast.....	15
Figure 2.4. A Game to Try to Get Eggs Upright on an Even Hard Surface, During the Peh Cun Traditional Chinese Festival at Parangkusumo Coast (Kedaulatan Rakyat Daily, 29 May 2009) .....	16
Figure 3.1. Longshore Current .....	21
Figure 3.2. The Barchan Dunes (source: <a href="http://www.nps.gov">www.nps.gov</a> ).....	25
Figure 3.3. The Transverse Dunes (source: <a href="http://www.classzone.com">www.classzone.com</a> )	26
Figure 3.4. The Parabolic Dunes (source: <a href="http://www.geo.msu.edu">www.geo.msu.edu</a> ) ...	27
Figure 3.5. The Linear Dunes (source: <a href="http://www.cartage.org.lb">www.cartage.org.lb</a> ).....	27
Figure 3.6. The Star Dunes (source: <a href="http://www.cartage.org.lb">www.cartage.org.lb</a> ) .....	28
Figure 3.7. Saltation Process .....	32
Figure 3.8. A Park Buried by Deflation Process along the Street from Parangtritis Beach to Parangkusumo Beach ....	36

Figure 3.9. Rip Current, Abrasion, and Deflation Hazard Map of Parangtritis Triangle Area .....	38
Figure 3.10. Rip Current, Abrasion, and Deflation Vulnerability Map of Parangtritis Triangle Area .....	39
Figure 3.11. Rip Current, Abrasion, and Deflation Risk Map of Parangtritis Triangle Area .....	39
Figure 4.1. Flowchart in Generating the Earthquake Risk Map...	51
Figure 4.2. Love Wave (a) and Rayleigh Wave (b).....	53
Figure 4.3. Earthquake Hazard Map in Parangtritis Triangle Area .....	55
Figure 4.4. Land Use Map in Parangtritis Area .....	58
Figure 4.5. Earthquake Disaster Vulnerability Map in Parangtritis Triangle Area .....	59
Figure 4.6. Earthquake Risk Map in Parangtritis Triangle Area ..	60
Figure 5.1. The Difference between the Wind Waves and Tsunamis .....	68
Figure 5.2. Characteristic of Tsunami Wave (Diposaptono and Budiman, 2006) .....	68
Figure 5.3. Map of Major Faults and Islands in Indonesia (Burbridge et al., 2008).....	70
Figure 5.4. Plots of Earthquakes Occurred in Indonesia from 1960 – 2000 (Triyoso, 2002 in Julkarnaen, 2008).....	71
Figure 5.5. The Relationship between Earthquake Strength and Epicenter Depth with the Formation of Tsunami Waves (Diposaptono and Budiman, 2006) .....	72
Figure 5.6. The Relationship between Earthquake Strength and Tsunami Magnitudes (Diposaptono and Budiman, 2006).....	73

Figure 5.7. Return Period of Tsunami in Subduction Zone as the Function of Magnitudes (Burbridge et al., 2008).....	76
Figure 5.8. Map of Tsunami Hazard in Parangtritis Triangle Area	77
Figure 5.9. Local Scale Tsunami Propagation Model and Simulation (with depth less than 100 m), Local Scale Impact, and Influencing Factors (Zobel et al., 2009) .....	79
Figure 5.10. Map of Tsunami Impact in Parangtritis Beach Based on the Tsunami Event in 2006 (Source: Giyanto, 2006)	79
Figure 5.11. Profile of Parangtritis Beach Area (Source: BAKOSURTANAL).....	80
Figure 5.12. Map of Tsunami Vulnerability in Parangtritis Triangle Area.....	81
Figure 5.13. Map of Land Use in Parangtritis before the Earthquake (2002).....	82
Figure 5.14. Map of Tsunami Risk in Parangtritis Area .....	85
Figure 6.1. Cleaning Service Attendant in Parangtritis Beach.....	103
Figure 6.2. Map of Social Conflict Hazard Potential in Parangtritis Triangle Area .....	110
Figure 6.3. Map of Land Use in Parangtritis Area (2002) .....	114
Figure 6.4. Map of Land Use in Parangtritis Area after the Earthquake (2008) .....	114
Figure 6.5. Map of Social Conflict Vulnerability Potential in Parangtritis Triangle Area .....	116
Figure 6.6. Map of Social Conflict Risk Potential in Parangtritis Triangle Area.....	117
Figure 7.1. A Holistic Concept in Disaster Management Risk Assessment .....	123

Figure 7.2.	Illustration of Disaster Risk with Constant C Factor (left) and Increased C Factor (right).....	124
Figure 7.3.	Multihazard Map of Parangtritis Triangle Zone .....	125
Figure 7.4.	Multivulnerability Map of Parangtritis Triangle Zone.....	125
Figure 7.5.	Multirisk Map of Parangtritis Triangle Zone.....	126
Figure 8.1.	The Development Guidance of the Spatial Planning and Governance Activity in Parangtritis (Source: Tourism Office, Bantul District, 2002).....	130
Figure 8.2.	Concept of Spatial Planning Guidance (Source: Bantul District Tourism Office, 2002).....	133
Figure 8.3.	The Distribution of Disaster Based Spatial Planning Analysis Zones.....	138
Figure 9.1.	Focus Group Discussion (FGD) in Parangtritis Village, Kretek Subdistrict, Bantul Regency.....	148
Figure 9.2.	Communication and Coordination System Planning in Parangtritis Village, Kretek Sub-district, Bantul District.....	152
Figure 10.1.	Landforms in Pacitan and the Shape of the Grindulu River as the Indicator of the Fault Existence .....	157
Figure 10.2.	The Location of Pacitan City Center which is Close to the Shoreline (about 2 km) .....	158
Figure 10.3.	A High House Foundation as the Effort to Adapt to Flood Event.....	159
